TECHNICAL INFORMATION

TO: Dealer Technical Department

FROM: RISO, Inc. Technical Department

SUBJECT: Pulse Motor/Cement Resistor

MODEL: 2700

Dated: 1/8/88
Issue No: T-8

Machines manufactured from serial number 90410350, have a new type pulse motors (part number 005-26000-102). The new motors are designed to be quieter in operation and they are interchangeable. However; when using the new type motors on some of the previous machines, it may be necessary to change to the new type cement resistors part number 401-82000-002. The new resistor is 20 ohms versus the old type 30 ohms.

If you order a pulse motor you will receive the new type motor. To avoid weak power in the pulse motor the new 20 ohm resistor must be used. The reference list below should be used when ordering a pulse motor to ensure the proper resistor is used.

Serial Number	Pulse Motor	OHM Register
90410001 - 90410189	Old Type	30 OHM
90410190 - 90410349	Old Type	20 OHM
90410350 - Present	New Type	20 OHM

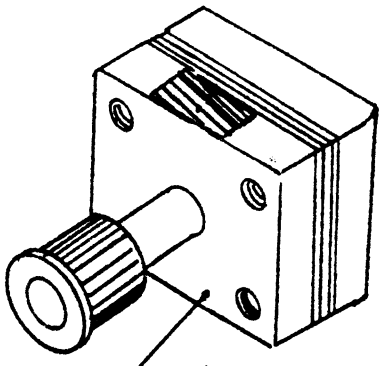
Remember New Pulse Motor Part No. 005-26000-102 needs 20 OHM resistors. Do not use 30 OHM resistors with new pulse motors.

Please make the following corrections in your parts and price book. (Price of parts to remain the same).

1. Write pulse motor part number 005-26000-102 Page II-38 Parts Book
2. Read pulse motor part number 005-26000-102 Page II-40 Parts Book
3. Cement Resistor MF 30A 200 JUL Page II-52 Parts Book
   Part No. 401-82000-002

① WRITE PULSE MOTOR

② READ PULSE MOTOR



005-26000-102
